

Class Project Demonstration

Start Assignment

- Due Dec 2 by 4:30pm
- Points 100
- Submitting a file upload
- Available Nov 25 at 12am - Dec 9 at 11:59pm

Hi All, Here is Rubric for the Class Project

Database Fundamentals Project Evaluation Rubric

Criteria	Excellent (10 pts)	Good (7-9 pts)	Fair (4-6 pts)	Needs Improvement (0-3 pts)
1. Database Design (ERD/Normalization)	Flawless ERD; 3NF+ normalization, clear PKs/FKs.	Mostly 3NF; minor redundancy or design gaps.	Partial normalization (1NF-2NF); unclear relationships.	Unnormalized; missing key constraints.
2. Schema Implementation (DDL)	Tables, constraints, indexes perfectly executed.	Minor errors (e.g., missing nullable fields).	Significant omissions (e.g., PKs/FKs).	Schema unusable or incomplete.
3. Data Integrity (Constraints/Triggers)	Robust constraints (PK, FK, CHECK) and triggers for business rules.	Basic constraints applied; triggers partially functional.	Limited integrity enforcement.	No constraints/triggers implemented.
4. Query Efficiency (Indexing/Optimization)	Optimal queries with indexing; no full scans.	Minor inefficiencies; lacks some indexes.	Poorly optimized (e.g., Cartesian joins).	Queries fail or lack optimization.
5. Stored Procedures/Functions	Reusable, efficient, with error handling.	Functional but lacks edge-case handling.	Partial functionality; logic errors.	Missing or non-functional.
6. Data Manipulation (DML)	Flawless INSERT/UPDATE/DELETE operations; handles edge cases.	Minor data inconsistencies.	Partial functionality; incorrect updates/deletes.	CRUD operations fail.

Criteria					Needs
		Excellent (10 pts)	Good (7-9 pts)	Fair (4-6 pts)	Improvement (0-3 pts)
7. User Interface (Forms/Reports)	Intuitive UI (A web Interface); professional reports.		Functional but unpolished.	Basic UI with usability issues.	Missing or unusable.
8. Documentation	Clear README, code comments, ERD, and setup instructions.		Adequate but missing details.	Minimal or unclear documentation.	No documentation provided.
9. Testing & Validation	Comprehensive test cases (edge cases, NULL handling).		Some testing but gaps in coverage.	Limited testing; untested scenarios.	No testing evidence.
10. Presentation & Clarity	Professional demo; justifies design choices clearly.		Explains logic but lacks depth.	Disorganized or unclear presentation.	No presentation.

Submission Guidelines:

1. You can show up in the class on December 2nd 4:30-5:45pm CST in the class and give me a demo.

OR

2. You can submit your class project online with HTML files for GUI, database dump as a .sql file, and a 5-minute video demonstrating how your project has all the rubric points implemented.
